INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN FLUIDS, VOL. 9. 1545–1546 (1989)

KEY WORD INDEX

Accuracy, 75
Accurate total pressure prediction, 855
Advection, 385
Advection–dispersion equation, 235
Aerofoil theory, 251
Axisymmetric turbulent flow, 167

Backstep channel, 1025
BEM, 1195
Biharmonic equation, 1221
Blade design, 921
Blast furnace, 569
Block Gaussian elimination, 1025
Boundary conditions, 59, 235, 1517
Boundary element method, 263
Boundary elements, 185
Boundary integral method, 651
Bubble, 1469
Bubbly pipe flow, 1207
Bulk dilation, 1073

Calculation procedure, 609
Camber ratio, 251
Central differences of $o(h^2;k^2)$, 1321
Centre implicit method, 1207
CFD, 1183
Chebyshev collocation, 499
Chebyshev polynomials, 427
Clebsch potentials, 130
Combined boundary integral equation method, 763
Combustors, 167
Comparison with experiment, 9, 23
Complex flows, 963
Complex geometries, 531
Compressible flow, 9, 1073
Compressors, 921
Conical diffusers, 987
Conjugate gradients, 213
Consistent penalty, 43
Convection, 427
Convection–diffusion, 385
Convective integration, 1059
Convective transport, 213
Coupled flow, 99
Covolume, 1145
Crank–Nicolson finite elements, 783, 811
Crank–Nicolson linear finite element scheme, 833
Creeping flow, 651
Crossflow, 1381
Curved pipe flow, 275
Czochralski crystal growth, 453

2D Advection–diffusion equation, 75
Deforming grids, 599
Delta wing, 943
Density correction, 609
Depth-averaged flow, 1369
Diffusers, 167
Direct solution method, 1025
Direct solver, 1087
Discrete vortex method, 23
Discretization accuracy, 855
Dispersion relation, 833
Domain decomposition, 499
3D vortex flows, 305
Dynamic stall, 891

Eddy dissipation concept, 289
Elliptic flow, 609
Enclosed turbulent diffusion flames, 289
Entrance flow, 275
Euler equations, 405, 1269
Expansion wave, 1011
Experimental validation, 275
Extrusion, 541

FEM, 1165
Finite cell method, 151
Finite difference formulation, 325
Finite difference method, 75
Finite differences, 167, 891, 1099
Finite element approximation, 305
Finite element method, 151, 275, 453, 557, 569, 731, 1059
Finite elements, 43, 213, 289, 405, 713, 1113, 1369
Finite volume, 1331
Finite volume method, 855, 943
Flow analysis, 569
Flow separation, 1395
Fluctuation Peclet number, 1431
Fluid dynamics, 9
Fluid flow, 151, 341
Fluid mechanics, 731
Fluid-structure interation, 763
Flux splitting, 517
Fourier analysis, 783, 811, 833
Fourier wave theory, 1453
Free boundary problem, 453, 1195
Free streamlines, 1113
Free surface, 1469, 1503
Free surface problem, 569

Gas dynamics, 363
Gaussian field approach, 1431
General non-orthogonal, 531
Generalized conjugate gradient, 127
Group velocity, 811

Heat exchangers, 1381
Heat transfer, 453, 713
High-speed flows, 1121
High-speed free-surface flow, 1331
Higher order finite difference method, 1517
Hydrodynamic interactions, 263
Hydrodynamic pressure, 1
Hydromagnetic, 375
Hyperbolic equations, 623
Hypersonic laminar–viscous flow, 405

ICCG, 341
Impinging jet, 1413
Implicit bidiagonal numerical method, 1413
Implicit scheme, 517
Incompressible flow, 251, 557, 1235, 1302
Incompressible fluid, 689
Incompressible fluid flow, 453
Incompressible separated flow, 1025
Industrial applications, 963
Influence matrix, 499
Inlet boundary conditions, 151
Integral conditions, 871
Intermediate Reynolds number, 1469
Inverse finite elements, 541
Inviscid flow, 1011
Irregular frequencies, 763
Iterative solution, 127

k-ϵ model, 167, 987
k-ϵ turbulence model, 289, 1073

Laminar flames, 499
Laminar flow, 1165
Laminar instability, 1395
Large-scale structures, 23
Least square, 557
Least-squares formulation, 305
Leonov model, 1059
Limit wave, 1453
Local parametrization of the equation of state, 1269
Low-Reynolds-number flow, 263

MacCormack implicit scheme, 1413
Magnetic field, 713
Marangoni convection, 1503
Metal casting, 541
Method of fundamental solutions, 1221
Method of sweeps, 1321
MG, 341
Mixed and penalty FEM, 99
Modified equivalent PDE approach, 75
Moment method, 289
Momentum transport, 23
Moving boundaries, 599
Multiconnected domains, 1285
Multifrontal solver, 731

Multigrid methods, 59, 113
Multi-sweep, 987

Navier–Stokes, 193, 341, 385, 871, 921, 1099
Navier–Stokes and energy equations, 325
Navier–Stokes equations, 99, 167, 405, 427, 891, 987, 1285, 1299, 1517
Navier–Stokes solutions, 747
Navier–Stokes solver, 943
Newton linearization, 305
Newtonian and Maxwell fluids, 557
Newton's iteration, 747
Newton's method, 1469
Noise attenuation, 363
Non-periodic, 1235
Non-symmetric matrices, 213
Non-uniform mesh, 783, 811
Numerical analysis, 151, 623
Numerical perturbation method, 599
Numerical simulation, 363
Numerical solution of partial differential equations, 599
Numerical solution of Poisson's equation, 599
Nusselt number, 1381

Oscillating aerofoil, 891
Oseen approximation, 1307

Partial flux splitting, 113
Peaceman–Rachford ADI method, 1307, 1321
Penalty function method, 275
Penalty method, 43
Petrov–Galerkin, 385
Phase change, 713
Polymer flow, 1487
Porous media, 1431
Potential flow, 1195
Preconditioning, 213
Pressure, 871
Pressure boundary condition, 1487
Pressure discretization, 99
Pressure single-valuedness, 1285
Pressure transients, 1207
Pressure-smoothing scheme, 557
PRIME, 341
Primitive variable formulation, 193
Probabilistic diffusion–convection equation, 1431
Process splitting, 235
Pseudospectral, 1235

Quadrature, 185
Quantum mechanics, 623
Quasi-3D and 3D systems, 921
QUICK, 341, 385

Radiating, 375
Random choice, 1145
Random walk method, 1431
Rarefied gas flow, 375
Real gases, 1269
Reciprocating engine flow, 1073
Reduced Navier–Stokes computations, 1395
Reflected/transmitted evanescent waves, 833
Reynolds number, 1099
Reynolds stress, 963
Reynolds stress model, 987
Riemann problem, 1145
RNS, 1087
Robust solutions, 325
Rotating circular duct, 151
Rotating concentric spheres, 1099
Rotating spheres, 689
Rotating viscous fluid, 1321
Round-off and ill conditioning, 99

Second moment, 963
Second order, 583
Second order accuracy, 1099
Sedimentation, 263
Segregated formulation, 289
Semidirect methods, 325
Separation, 1087
Shock capturing, 9
Shock flow, 363
Shock tube, 9
Shock wave, 1011
Shock wave interactions, 405
Shock wave/boundary layer interactions, 747
Silencers, 363
SIMPLE, 341
Simple layer potential, 1221
Simulation, 341
Singular finite elements, 1353
Solidification, 541
SOR method, 1307
Spectral method, 427
Stability, 75
Stable schemes, 583
Staggered grid, 193
Steady Euler equations, 59, 305
Steady Navier–Stokes equations, 113
Stokes equations, 185
Stokes flow, 651, 1221, 1353
Streamfunction, 1099, 1453
Streamfunction co-ordinates, 1183
Streamfunction–vorticity, 1369, 1381
Stress singularity, 1353
Subsonic and supersonic flows, 305
Suspensions, 263
Swirl, 151, 987
Symmetric line relaxation, 747

Theodorsen's method, 251
Thickness ratio, 251
Three-dimensional, 1302
Through-flow, 921
Time marching, 405, 1331
Time-dependent momentum fluctuations, 23
Transient flows, 891
Transonic flows, 59, 517
Transonics, 1183
Transport equations, 963
Transputer networks, 731
Trefftz method, 1
Triangular co-ordinates, 185
Triangular step, 1165
Truncation order, 1453
Tube bundle, 1381
Turbines, 921
Turbulence, 963, 987, 1121
Turbulent mixing layers, 23
TVD scheme, 9, 1011
Two-phase flows, 263
Two-phase pipe flow, 1207
Two-phase system, 1431
Two-step explicit scheme, 1487

Unsteady, 341
Unsteady incompressible flow, 599
Unsteady Navier–Stokes equations, 1025
Unstructured grids, 1121
Upwind, 385, 583
Upwind differencings, 747

Variational method, 305
Velocity correction, 1165
Velocity correction method, 1487
Viscoelastic flow, 1059
Viscoelastic fluid, 1487
Viscous, 531
Viscous flow, 127, 689, 713, 943
Vortex motion, 943
Vorticity, 871
Vorticity function, 1099
Vorticity–velocity, 1285

Wakes, 1113
Wall Green function, 651
Wave propagation, 623
Wave reflection/transmission, 783, 811
Wave resistance, 1195
Weighted discretization, 75
Welding, 1503

Zonal grid, 167

CONTENTS

Volume 9, Issue Nos. 1–12 (1989)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, January

Trefftz Method for Hydrodynamic Pressure on Rigid Dams with Non-vertical Upstream Face: Y.-C. Wu and D.-J. Yu 1

Comparison with Experiment for TVD Calculations of Blast Waves from a Shock Tube: C. H. Cooke and K. S. Fansler 9

Momentum Transport in a Turbulent Mixing Layer: R. Chein, J. N. Chung and T. R. Troutt 23

Velocity–Pressure Integrated Versus Penalty Finite Element Methods for High-Reynolds-number Flows: S.-W. Kim and R. A. Decker 43

Euler Flow Solutions for Transonic Shock Wave–Boundary Layer Interaction: B. Koren 59

Finite Difference Methods for Solving the Two-dimensional Advection–Diffusion Equation: B. J. Noye and H. H. Tan 75

Are FEM Solutions of Incompressible Flows Really Incompressible? (Or How Simple Flows Can Cause Headaches!): D. Pelletier, A. Fortin and R. Camarero 99

A Multigrid Method for Steady Incompressible Navier–Stokes Equations Based on Partial Flux Splitting: E. Dick 113

CONFERENCE DIARY 121

ANNOUNCEMENT 125

Indexed or abstracted by 'Applied Mechanics Reviews', 'Cambridge Scientific Abstracts', 'CITIS—Civil Engineering Abstracts', 'Current Contents', 'Engineering Index', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geo Abstracts', 'INSPEC', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Eng Analysis Software', 'Shock & Vibration Digest' and 'Zentralblatt für Mathematik'.

Issue No. 2, February

Performance of Iterative Methods for Newtonian and Generalized Newtonian Flows: G. F. Carey, K. C. Wang and W. D. Joubert 127

Numerical Analysis of the Developing Fluid Flow in a Circular Duct Rotating Steadily About a Parallel Axis: D. T. Gethin and A. R. Johnson 151

Numerical Simulation of Axisymmetric Turbulent Flow in Combustors and Diffusers: C.-N. Yung, T. G. Keith, Jr. and K. J. De Witt 167

Efficient Quadrature for a Boundary Element Method to Compute Three-dimensional Stokes Flow: W. Varnhorn 185

Effects of Grid Staggering on Numerical Schemes: T. M. Shih, C. H. Tan and B. C. Hwang 193

Conjugate Gradient Methods and ILU Preconditioning of Non-symmetric Matrix Systems with Arbitrary Sparsity Patterns: H. P. Langtangen 213

SHORT COMMUNICATION

Process Splitting of the Boundary Conditions for the Advection–dispersion Equation: K. O. Aiyesimoju and R. J. Sobey 235

CONFERENCE DIARY 245

ANNOUNCEMENTS 250

Issue No. 3, March

REFEREES FOR 1988 iii

A New Look at Theodorsen's Method in Aerofoil Theory: R. K. Bera 251

Numerical Simulation of the Hydrodynamic Interaction Between a Sedimenting Particle and a Neutrally Buoyant Particle: M. S. Ingber 263

A Finite Element Analysis of the Steady Laminar Entrance Flow in 90° Curved Tube: F. N. Van de Vosse, A. A. Van Steenhoven, A. Segal and J. D. Janssen . 275

Finite Element Solution of an Enclosed Turbulent Diffusion Flame: A. C. Benim . 289

Computation of 3D Vortex Flows Past a Flat Plate at Incidence Through a Variational Approach of the Full Steady Euler Equations: C.-H. Bruneau, J. Laminie and J.-J. Chattot 305

Robust Semidirect Finite Difference Methods for Solving the Navier–Stokes and Energy Equations: J. W. MacArthur and S. V. Patankar 325

Three-dimensional Unsteady Flow Simulations: Alternative Strategies for a Volume-averaged Calculation: C.-Y. Perng and R. L. Street 341

Numerical Simulation of Silencers: C. H. Cooke and K. S. Fansler 363

CONFERENCE DIARY 369

ANNOUNCEMENT 374

Issue No. 4, April

Radiative Transfer to Oscillatory Hydromagnetic Rotating Flow of a Rarefied Gas Past a Horizontal Flat Plate: A. R. Bestman 375

Upwind Basis Finite Elements for Convection-dominated Problems: P. M. Steffler 385

A Point Implicit Unstructured Grid Solver for the Euler and Navier–Stokes Equations: R. R. Thareja, J. R. Stewart, O. Hassan, K. Morgan and J. Peraire... 405

A Chebyshev Collocation Method for the Navier–Stokes Equations with Application to Double-diffusive Convection: U. Ehrenstein and R. Peyret..... 427

A Finite Element Method for Analysis of Fluid Flow, Heat Transfer and Free Interfaces in Czochralski Crystal Growth: P. A. Sackinger, R. A. Brown and J. J. Derby 453

CONFERENCE DIARY..... 493

ANNOUNCEMENT 498

Issue No. 5, May

Flame Computations by a Chebyshev Multidomain Method: U. Ehrenstein, H. Guillard and R. Peyret..... 499

An Efficient Upwind/Relaxation Algorithm for the Euler and Navier–Stokes Equations: G.-C. Zha, D.-Z. Liu and T.-Y. Ma 517

Mathematical Derivation of a Finite Volume Formulation for Laminar Flow in Complex Geometries: L. Davidson and P. Hedberg 531

An Inverse Finite Element Method with an Application to Extrusion with Solidification: A. N. Alexandrou, N. R. Anturkar and T. C. Papanastasiou 541

A Pressure-smoothing Scheme for Incompressible Flow Problems: T. Shiojima and Y. Shimazaki 557

A Finite Element Analysis of a Free Surface Drainage Problem of Two Immiscible Fluids: M. Mori, M. Natori and G.-F. Zhang..... 569

Stable Second-order Accurate Iterative Solutions for Second-order Elliptic Problems: A. Lin 583

Numerical Perturbation Method for Approximate Solution of Poisson's Equation on a Moderately Deforming Grid: J. Strigberger..... 599

A Calculation Procedure for Steady Two-dimensional Elliptic Flows: Y. Wang, J. He and B. Q. Zhang 609

CONFERENCE DIARY..... 619

Issue No. 6, June

Quantum Phenomena in Numerical Wave Propagation: R. Vichnevetsky 623

Low Reynolds Number Hydrodynamic Interaction of a Solid Particle with a Planar Wall: E. P. Ascoli, D. S. Dandy and L. G. Leal 651

Numerical Study of the Axially Symmetric Motion of an Incompressible Viscous Fluid in an Annulus between Two Concentric Rotating Spheres: J.-K. Yang, N. J. Nigro, A. F. Elkouh and J. C. Gagliardi 689

Coupled Heat Transfer and Viscous Flow, and Magnetic Effects in Weld Pool Analysis: R. McLay and G. F. Carey 713

Multifronts and Transputer Networks for Solving Fluid Mechanical Finite Element Systems: R. G. Miles and S. P. Havard 731

CONFERENCE DIARY 741

Issue No. 7, July

A Newton/Upwind Method and Numerical Study of Shock Wave/Boundary Layer Interactions: M.-S. Liou 747

Suppression of Irregular Frequency Effects in Fluid-structure Interaction Problems Using a Combined Boundary Integral Equation Method: S. M. Lau and G. E. Hearn 763

Internal Wave Reflections and Transmissions Arising from a Non-uniform Mesh. Part I: An Analysis for the Crank–Nicolson Linear Finite Element Scheme: B. Cathers, S. Bates and B. A. O'Connor 783

Internal Wave Reflections and Transmissions Arising from a Non-uniform Mesh. Part II: A Generalized Analysis for the Crank–Nicolson Linear Finite Element Scheme: B. Cathers, S. Bates, R. Penoyre and B. A. O'Connor 811

Internal Wave Reflections and Transmissions Arising from a Non-uniform Mesh. Part III: The Occurrence of Evanescent Waves in the Crank–Nicolson Linear Finite Element Scheme: B. Cathers, S. Bates and B. A. O'Connor 833

A Total Pressure Correction for Upstream Weighted Schemes: V. De Henau, G. D. Raithby and B. E. Thompson 855

CONFERENCE DIARY 865

Issue No. 8, August

Special Issue

These selected papers are extended and refereed versions of those presented at the 2nd International Symposium on Computational Fluid Dynamics Sydney, Australia, 24–27 August 1987

Some Uses of Green's Theorem in Solving the Navier–Stokes Equations: S. C. R. Dennis and L. Quartapelle 871

Numerical Simulation and Hydrodynamic Visualization of Transient Viscous Flow Around an Oscillating Aerofoil: O. Daube, L. Ta Phuoc, A. Dulieu, M. Coutanceau, K. Ohmi and A. Texier 891

The Development of Advanced Computational Methods for Turbomachinery Blade Design: P. Stow 921

Navier–Stokes Computation of Transonic Vortices Over a Round Leading Edge Delta Wing: B. Müller and A. Rizzi 943

Second-moment Closure and its Use in Modelling Turbulent Industrial Flows: B. E. Launder 963

Comparison of k–ε and Algebraic Reynolds Stress Models for Swirling Diffuser Flow: S. W. Armfield and C. A. J. Fletcher 987

On TVD Difference Schemes for the Three-dimensional Euler Equations in General Co-ordinates: Y. Takakura, T. Ishiguro and S. Ogawa 1011

Analysis of Incompressible Massively Separated Viscous Flows Using Unsteady Navier–Stokes Equations: K. N. Ghia, G. A. Osswald and U. Ghia 1025

CONFERENCE DIARY 1051

ANNOUNCEMENTS 1057

Issue No. 9, September

Finite Element Technique to Solve the Elastic Strain for Leonov Fluid Flow: G.-G. Lin, H.-C. Tseng and Y.-S. Ju 1059

Assessment of Variants of the $k - \varepsilon$ Turbulence Model for Engine Flow Applications: B. Ahmadi-Befrui and A. D. Gosman 1073

Three-dimensional Reduced Navier–Stokes Solutions for Subsonic Separated and Non-separated Flows, Using a Global Pressure Relaxation Procedure: R. Cohen and P. K. Khosla 1087

Second-order Finite Difference Solutions for the Flow Between Rotating Concentric Spheres: S. Schwengels, D. Schultz and W. Shay 1099

A Velocity Formulation for Flow Past a Symmetric Profile with a Wake: S. M. Räsänen 1113

Algebraic Turbulence Models for the Computation of Two-dimensional High-speed Flows Using Unstructured Grids: P. Rostand 1121

A Fast Riemann Solver with Constant Covolume Applied to the Random Choice Method: E. F. Toro 1145

Laminar Flow and Heat Transfer Over a Two-dimensional Triangular Step: S. G. Ravi Kumar, P. A. Aswatha Narayana, K. N. Seetharamu and B. Ramaswamy . 1165

CONFERENCE DIARY 1179

Issue No. 10, October

Numerical Solution of Transonic Flows on a Streamfunction Co-ordinate System: R. M. Barron and R. K. Naeem 1183

A Boundary Element Method for a Non-linear Free Surface Problem: E. Campana, F. Lalli and U. Bulgarelli 1195

An Investigation of Pressure Transients in Pipelines with Two-phase Bubbly Flow: K. C. Ng and C. Yap 1207

The Simple Layer Potential Method of Fundamental Solutions for Certain Biharmonic Problems: A. Karageorghis and G. Fairweather 1221

On the Application of Pseudospectral FFT Techniques to Non-periodic Problems: S. Biringen and K. H. Kao 1235

An Efficient Algorithm for Compressible Flows with Real Gases: P. Glaister 1269

Vorticity–velocity Formulation in the Computation of Flows in Multi-connected Domains: F. Stella and G. Guj 1285

COMMENTS

Comment on 'Generalized Potential Flow Theory and Direct Calculation of Velocities Applied to the Numerical Solution of the Navier–Stokes and the Boussinesq Equations': S. Abdallah and S. Deutsch 1299

Comments on a Recent Paper by W. Zijl: H. S. Greenside 1302

CONFERENCE DIARY 1305

Issue No. 11, November

Numerical Studies of Slow Viscous Rotating Flow Past a Sphere. II: C. V. Raghavarao and K. Pramadavalli 1307

Numerical Studies of Slow Viscous Rotating Flow Past a Sphere. III: C. V. Raghavarao and K. Pramadavalli 1321

Two-dimensional Subcritical and Supercritical Open Channel Flow Calculation Using a Time-marching Method: J. V. Soulis 1331

A Singular Finite Element for Stokes Flow: The Stick–slip Problem: G. C. Georgiou, L. G. Olson, W. W. Schultz and S. Sagan 1353

A Comparison of Primitive Variables and Streamfunction–vorticity for FEM Depth-averaged Modelling of Steady Flow: B. A. De Vantier 1369

A Numerical Study of Heat and Momentum Transfer for Tube Bundles in Crossflow: Y. Chang, A. N. Beris and E. E. Michaelides 1381

Convergence Properties of High-Reynolds-number Separated Flow Calculations: S. G. Rubin and A. Himansu 1395

Numerical Simulation of an Impinging Jet on a Flat Plate: S.-H. Chuang 1413

CONFERENCE DIARY 1427

ANNOUNCEMENT 1429

Issue No. 12, December

Probabilistic Approach for Transport of Contaminants Through Porous Media: M. C. Roco, J. Khadilkar and J. Zhang 1431

Variations on Fourier Wave Theory: R. J. Sobey 1453

A Newton's Method Scheme for Solving Free-surface Flow Problems: D. S. Dandy and L. G. Leal 1469

A Finite Element Analysis of Laminar Unsteady Flow of Viscoelastic Fluids Through Channels with Non-uniform Cross-sections: R. Ponnalagarsamy and M. Kawahara 1487

Marangoni Convection in Weld Pools with a Free Surface: M. C. Tsai and S. Kou 1503

High-order Axisymmetric Navier–Stokes Code: Description and Evaluation of Boundary Conditions: J. N. Sørensen and Ta Phuoc Loc 1517

CONFERENCE DIARY 1539
